

PRESCRIPTION DRUG MONITORING PROGRAM (PDMP)

OVERVIEW: The SD Prescription Drug Monitoring Program (SD PDMP) is an electronic database that collects dispensed controlled substance prescription data. Program goals are to both improve patient care, ensuring patients maintain access to appropriate pharmaceutical therapy, and to deter drug diversion. PDMPs can help identify patients at risk of misuse and abuse and get them on the path to treatment and recovery. According to the CDC, PDMPs are one of the most promising state-level interventions to improve opioid prescribing, inform clinical practice, and protect patients at risk.

SD PDMP DATA

Visit the **Key Data** section on www.AvoidOpioidSD.com for updated **PDMP data dashboards** on prescription count, prescription total quantity and prescription total days of supply.

PDMP Introduction

South Dakota's PDMP was established by the state legislature in 2010 (SDCL 34-20E) to improve patient care and reduce drug diversion.

- Operations began in March 2012 under the purview of the SD Board of Pharmacy. The system included retroactive data from July 2011.

PDMP Management

South Dakota's PDMP is managed by the SD Board of Pharmacy, which requires the following:

- Dispensers must submit their dispensed controlled substance prescription data for schedules II, III, and IV (in SD schedule IV includes V) at least once every twenty-four hours (federal facilities are not required to submit, though IHS and the VA participate).
- Mandated PDMP registration for all prescribers with a SD Controlled Substance Registration began July 1, 2017. (SDCL 34-20E-2.1)

PDMP Expansion

Enhancement projects for the SD PDMP include:

- Continued integration into health systems' electronic health records and pharmacy management systems
- Quarterly Prescriber Reports
- Platform updated to the NarxCare PDMP Report
