

RECOVERY SUPPORT SERVICES

The process of recovery is highly personal and occurs via many pathways. Recovery-oriented care and recovery support systems help people with mental health concerns and substance use disorders manage their conditions successfully. Recovery is a process of change through which people improve their health and wellness, live self-directed lives, and strive to reach their full potential¹.

KEY PARTNERS:

- Bethany Christian Services
- Oxford House Inc.
- Face It TOGETHER
- Project Recovery

AS OF
OCTOBER 2023...

CAPACITY BUILDING EFFORTS TO DATE

Specialized Case Management Services

Case managers work to identify psychosocial issues, anticipating potential issues their client may encounter and helping the client obtain resources needed to support their recovery. Bethany Christian Services support expectant and new mothers impacted by opioid or stimulant use through evidence-based specialized case management services through their signature prevention program, ReNew (Recovering Mothers with Newborns).

Peer Recovery Support Services

South Dakota's peer recovery support model utilizes peer support specialists, or individuals who have been successful in the recovery process. Peer support specialists engage in a wide range of activities such as advocating for people in recovery, sharing resources and building skills, building community and relationships, leading recovery groups, mentoring, and goal-setting. Services can be stand-alone or integrated into clinics, treatment agencies, or other settings.

Supportive Recovery Housing

Recovery housing is an intervention that is specifically designed to address the recovering person's need for a safe and healthy living environment while supplying the requisite recovery and peer supports². Increasing access to supportive recovery-oriented transitional housing for South Dakotans impacted by addiction is a key priority supported by the State Opioid Response grant. In partnership with Oxford House, Inc., new recovery homes are under development, each of which will allow admittance of individuals in medication-assisted treatment for their recovery from substance abuse. Oxford House will also aid in the establishment of a South Dakota chapter to support sustainable implementation of the model and provide guidance to existing Oxford Homes statewide.

Oxford House manages 19 houses with a total capacity of 150 beds across South Dakota.

Project Recovery has integrated peer recovery support coaching services into its continuum of care, providing 95% of its MOUD clients with at least 15 minutes of peer coaching as part of their treatment plan.

Face It TOGETHER engaged with more than 300 individuals impacted by opioid or stimulant use between FFY22 and FFY23 (October 2021-September 2023).

A total of 33 women successfully completed the ReNew Program with Bethany through FFY23. On average, program graduates received services for 14-15 months.

If you or someone you know is struggling with opioid addiction – don't wait. Reach out.
