

UNIVERSAL PREVENTION

The South Dakota Department of Social Services and the Department of Health actively work with numerous partners to provide prevention awareness and education to youth, families and adults across South Dakota's communities. Supported activities are evidence-based and in alignment with SAMHSA's Opioid Overdose Prevention Toolkit.

KEY PARTNERS:

- Prevention Resource Centers
- Community-Based Prevention Providers

**AS OF
OCTOBER 2023...**

STRATEGIES

 Deliver evidence-based opioid awareness and education programming to middle- and high-school youth as well as community members at large in partnership with community-based coalitions and the Prevention Resource Centers across South Dakota. Events and activities range from in-school programming to community-specific conversations, training events, or town halls.

 Support South Dakota communities as they build capacity and establish multi-sector partnerships to address the opioid epidemic at the local level. Plan and execute community-specific conversations and training events.

 Provide education on safe disposal strategies for unwanted, unused, or expired medications.

 Support public awareness efforts that feature personal testimonials from individuals with lived experience that reflect the cultural and geographic diversity of South Dakota.

 Coordinate trainings for prevention professionals in early intervention, which focuses on screening and brief interventions for substance use problems at an early stage.

 **More than 5,100 individuals** have participated in locally-delivered prevention training or town hall meetings.

 **More than 2,600 individuals** - youth and adults - engaged with a PRC through universal prevention strategies in the last academic year (August 2022-May 2023).

 **Over 10,800 youth** have been impacted by evidence-based prevention programming in schools or after-school settings.

If you or someone you know is struggling with opioid addiction – don't wait. Reach out.
